Hydrostatic Trencher / Plow

RT450

RT450

A Winning Combination of Convenience and Performance

With unmatched maneuverability, the RT450 is the equipment solution for rental customers, and gas, water / irrigation, cable and electrical contractors. Boasting the shortest turning radius in the industry with optional rear steer capabilities, this machine is capable of getting the job done.

Backed by a 46.3 hp (34.5 kW) Deutz engine, the RT450 delivers the power necessary to tackle tough jobs. In addition, the standard Operator Presence System automatically shuts down the engine when the operator leaves the seat. A set of LED lights, located on the dash, monitors air filter, engine, hydraulic system, and operator presence system allowing for reliable and efficient machine operation.

Control at your fingertips. Standard remote controls include blade lift, start, and stop. Creep control is optional.

Raising the standards. Available on both center-mount and sliding offset models, a radial piston trencher drive motor provides reliability and productivity.

Readily accessible. Color coded grouped controls, positioned to the right side of the operator station, contribute to ease of operation and boosting productivity.

Quality Parts and Service.

Get the parts and service edge. In addition to providing quality equipment, Vermeer delivers top-quality parts and superior services. Vermeer parts are manufactured to exacting specifications to help keep your Vermeer equipment running trouble-free and at OEM specifications.

Vermeer offers factory programs to its dealer network to ensure that the most current service procedures are presented to the service personnel of your Vermeer dealer.

Genuine Vermeer parts are precision crafted to match your Vermeer equipment EXACTLY. This ensures that your system will run as smoothly as possible, with the least amount of service and maintenance.
